

As the school year draws to a close I look back on the accomplishments of the school year 1988-1989. For the first time we have students taking spanish, we have at least 10 students taking various regents examinations and although our graduating class is small many are planning to attend post-secondary education. We can all be very proud as we look back on the past year and note from whence we have come. I am indeed happy to have been a part of the growth that has taken place in so many of the lives of our students, none of which could have been accomplished without the exceptional staff. You maintain a positive attitude even in difficult times. Whatever successes we have had came only through your efforts and perserverance.

I cannot conclude the year without saying thank you and good-bye to Mr. David A. Brown who has served as our Superintendent since 1982. We do appreciate the things that he did to help make Street Academy a better place, the things that he tried to do and did not achieve and for his caring and concern. He will surely be missed.

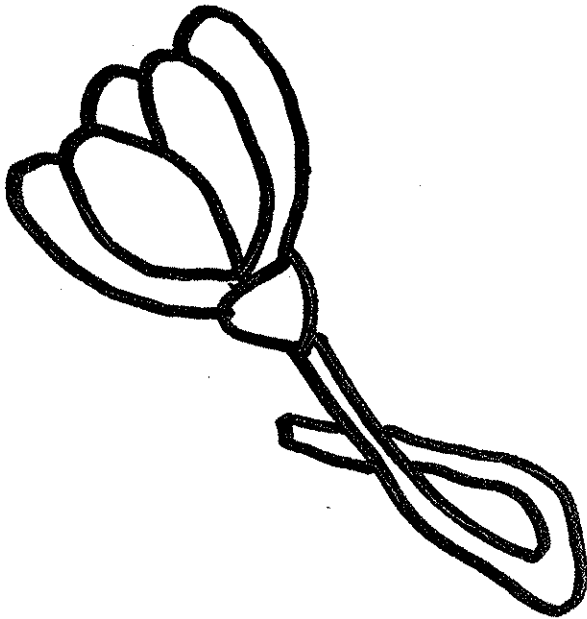

We will all continue to strive to make the world a better world than we found it and to make every student become a productive part of this world.

SENIORS

WE ROSE TO MATURITY

LINCOLN ARTIS

I want to go to college to study computers. I like Street Academy because of the teachers. They really care about the students who attend the school. In my opinion Street Academy is definitely better than Albany High.

CASANDRA BONNER

I plan in getting an associates degree in nursing at Hudson Valley Community College. Street Academy is a nice school. I am glad I came here. It gave me a chance to express my feelings.

BRIDGET LYNCH

I want to go to college for computer science. Street Academy had a big influence on my life.

PATRICE MCGILL

I want to get into law enforcement. Street Academy is a great learning institution. My message to the upcoming classes is to try to improve yourself in the fullest.

ALNIDA MORRIS

I plan to go to college on weekends to get my degree at F.I.T., Fashion Institute of Technology. I think Street Academy is a school that helps out students like myself if you need independent study or extra help. It's not what people think that it is a school for the bad kids, because I chose to come here on my own. P.S. To all my physicals and everybody else: Hang in there and do the right thing.

ANIKA PEITY

I plan on going to college part time for Business Administration. My goal is to be a business executive. I received a lot of individual attention at Street Academy.

JOSEPH SHADICK

After I graduate from Street Academy I am going to the Marine Corps. I will make a career out of it. It will take me until I am 38 years old; then I can retire and collect a pension from the government. Street Academy is great. It is the best school I went to.

RODNEY SMITH

I plan to have fun this summer and doing maintenance and ground work in the fall. Street Academy is a nice quiet school. To everybody at Street Academy; Enjoy your summer.
